

Go to <https://www.videolan.org/vlc/>

1. Click on the orange link that says "Download VLC Player" in the top section of the page
2. A download should appear in your browser, or click ctrl+J to view all downloads
3. Open the VLC file, and select "Run"
4. Choose your desired language
5. You'll get the "welcome to the installer" window. Click "Next >"
6. Read through the agreement, then click "Next >"
7. On the Choose Components page, deselect everything but "Start Menu Shortcut." Click "Next >"
8. Verify that the location where it will be downloaded is correct, or browse for a new location. Click "Install"
9. Once it's finished, click "Finish" to close the installer.

Now your videos will either automatically open this program, or if you right click on the file and select "Open With" it should be one of the options.
